Investment objective

The Fundsmith Equity ETF seeks long-term growth in value by investing in a concentrated portfolio of high-quality companies listed on developed global equity markets.

The investment approach is patient and long term, focusing on a limited number of businesses that demonstrate durable competitive advantages, strong cash flow generation, and a high standard of overall business quality.

The Fund is based on the Fundsmith Equity Strategy, which was launched in 2010 under the direction of Terry Smith (CIO), a well-recognized investor in the UK with over 40 years of investment experience. He is assisted by a highly experienced investment team that has worked together for many years, with minimal turnover.

Portfolio construction reflects a disciplined, high-conviction approach, with an emphasis on long-term ownership rather than short-term trading. Holdings are selected using a consistent investment process, with the aim of allowing underlying businesses time to compound value over full market cycles.

Performance shown for less than one year is not annualized. Performance data quoted represents past performance. Past performance is no guarantee of future results so that shares, when redeemed, may be worth more or less than their original cost. The investment return and principal value will fluctuate. Current performance may be higher or lower than the performance quoted. Performance includes reinvested distributions and capital gains. Performance data current to the most recent month-end is available at www.fundsmithetf.us.

Market Price is based on the midpoint of the bid/ask spread at 4 p.m. ET and does not represent the returns an investor would receive if shares were traded at other times. Fund inception date: 1st December 2025.

The MSCI World Index captures large and mid-cap representation across 23 Developed Markets (DM) countries. The index covers approximately 85% of the free float-adjusted market capitalization in each country. One may not invest directly in an index.

Fund Disclosure

Fundsmith Investment Services Limited, registered investment adviser with the SEC, is the investment adviser to the fund.

ALPS Distributors, Inc. is the distributor for the fund.

Risk Considerations

An investor should consider the investment objectives, risks, charges and expenses carefully before investing. To obtain a prospectus containing this and other information, call +1203-594-1863 or [click here](#). Read the prospectus carefully before investing.

The Fund was recently formed and therefore has limited performance history for investors to evaluate. The Fund currently has fewer assets than larger funds, and like other relatively new funds, large inflows and outflows may impact the Fund's market exposure for limited periods of time.

All investments are subject to risks, including the loss of money and the possible loss of the entire principal amount invested. Additional information regarding the risks of an investment is available in the prospectus.

The values of equity securities, such as common stocks and preferred stock, may decline due to general market conditions that are not specifically related to a particular company, such as real or perceived adverse economic conditions, inflation (or expectations for inflation), changes in the general outlook for corporate earnings, changes in interest or currency rates or adverse investor sentiment generally. Equity securities generally have greater price volatility than fixed-income securities.

Shares of ETFs are bought and sold at market price (not NAV) and are not individually redeemable. Diversification does not eliminate the risk of experiencing investment losses.

Not FDIC Insured • No Bank Guarantee • May Lose Value
